Subject: Gary Development Reference 22

Mark,

I have reviewed the document identified as "Reference 22" that was written on the Gary Development Company, Inc. Landfill and initiated by Matthew T. Klien and dated October 14, 1996. The document is labeled as Enforcement Sensitive, Attorney-Client Work Product, Not for Public View. Given the amount of time that has transpired and the current legal status of the landfill the document should no longer be considered Enforcement Sensitive and be considered a public document. In my opinion, the benefit of the information provided in the document far outweighs any impact providing it as a public document would have on its legal status.
